## **DETAILED ACTION**

### ***Inventorship***

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

In view of the papers filed on 2 September 2003, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by the addition of Louis J. Nicastro as a joint inventor.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of the file jacket and PTO PALM data to reflect the inventorship as corrected.

***Election/Restrictions***

Claims 6-28 and 30-52 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Patent Number 2,337,625 by Sacksteder (hereinafter Sacksteder). The change dispenser disclosed by Sacksteder incorporates a receptacle 10 and a change receiver 14 that read on the Applicant's coin tray and movable member, respectively. Sacksteder fails to disclose a coin handling arrangement that is used in conjunction with a gaming machine. However, change dispenser disclosed by Sacksteder operates in substantially the same way as the Applicant's claimed invention. Specifically, coins are gravity-fed into the mechanism from above and are either allowed to fall into a receptacle beneath a coin chute (disabled position) or are channeled out of said mechanism via said coin chute (enabled position).

Art Unit: 3653

Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the change dispenser of Sacksteder into the outlet portion of a gaming machine to provide an effective means of channeling coins to either the gaming machine tray or outside of the tray.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 29 is rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number 5,715,928 by Bradley (hereinafter Bradley). The coin chute arrangement disclosed by Bradley incorporated chute 16 and tray 12 that read on the Applicant's guiding member and coin tray, respectively.

### ***Allowable Subject Matter***

Claims 4 and 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The following related art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Application Publication Number US 2003/0015397 A1 published 23 January 2003 because of its extendable chute portion 16,  
Patent Number 4,122,932 by Neubert et al because of its bottom panel 40,  
Patent Number 2,561,880 by Nicolaus et al because of its tray portion 30,  
Patent Number 1,885,582 by Brandt because of its trough-like member 1,  
Patent Number 480,360 by Avery because of its balanced plate H, and  
German Patent Publication Number DE 3246815 A1 published 20 June 1984 because of its movable chute 4.
